IKL

IKL BEARINGS BROCHURE

WHO WE ARE?

IKL is one of the leading brands in Bearing manufacturing whose name is synonymous with high quality products and services. With the heritage of manufacturing excellence of Slovakia in mid-sixties, IKL Bearings are superior in engineering and fineness of design. The manufacturing legacy of 7 decades began in erstwhile Czechoslovakia with production of high-precision bearings for the aircraft industry. Although, IKL started manufacturing of bearings in early fifties, the complete range of standard bearings started to be rolled out from the company in early sixties.

IKL started marketing their Standard and Non-standard bearings worldwide in nineties and today it has earned a prestigious position amongst the western bearing brands and is widely used by the European and American engineering industry along with the Asian markets. IKL is the sole distributor of IKL, Ltd., Slovakia and started its operation in year 2007. With a central warehouse and strategically located offices, IKL has got the momentum right. Efficient team, customer focus, exceptional quality, stable deliveries and competitive prices have made IKL the preferred brand in Industrial markets.

WHAT DO WE OFFER?

IKL stands for 'Value Addition' – Offering its customers the best quality backed by just-in-time delivery – at the most economical prices. Our engineers invest quality time and resources on cutting edge Research & Development. Finest of raw materials go into making precision components and advanced manufacturing techniques ensure superior products. To further the experience, our team of engineers understand the requirement at hand and offer optimized solutions. With a sprawling Central Warehouse situated in Kolkata, IKL India carries in its Inventory, almost 80% of the

Standard bearing types that the Indian Engineering Industry usually requires – thus offering its customers a tremendous scope of saving Inventory Carrying Costs by offering them Off-the-Shelf Door Delivery in most of the cases. Specialists in developing Non-standard precision bearings, IKL has seamlessly amalgamated the latest technology with the tradition of European products and processes. Whatever be the needs of heavy engineering industry, IKL can cater to it with its Application Optimized Bearings.

OUR FOCUS IS ON:

Agriculture Machines
Tortilla Machines
Machine Tools
Automotive
Power Plants
Windmills
Rolling Mills
Cement Plants
Paper Plants
Sugar Plants
Steel Industry
Other Industrial Needs

OUR VISION:

To start-off we aim to be amongst the top 6 leading brands (in terms of market share) in Industrial. Bearings segment by 2017. To be the Brand asked for by its name, preferred for its unsurpassed quality and associated with organizations whose zeal and values are similar. Our vision serves as the beacon and guides every aspect of our business by describing what we need to accomplish in order to continue achieving sustainable and quality growth.

OUR MISSION:

To be the preferred choice of our customers by serving them with:

World-Class products & services at competitive prices
Just in time (JIT) delivery assurance
Application Optimized Solutions
Solutions to improve their rotational efficiency & effectiveness, in turn making them more successful and profitable
Material Handling
Earth Movers Pulp & Paper Agriculture
Food Processing Pumps and Compressors Electric Motors
Textile Automotive Chemical and Fertilizers

OUR PRODUCT RANGE:

Ball Bearings

Single Row Deep Groove Ball Bearings.
Different seals like RS, 2RS, Z, ZZ.
Different cages like Pressed steel & Brass

Taper Roller Bearings

Single Row Metric and inch dimensions.

Spherical Thrust Bearings

Brass or Steel cage.

Spherical Roller Bearings

Double Row with brass or steel cage.
Straight or taper bore.

Sleeves

With unique properties of heat, disbursement, relubrication facility, superior sealing arrangement

Self Aligning Ball Bearings

Double Row straight or tapered bore Spherical outer ring raceway allows self alignment

Multirow Large Bore Bearings

Cylindrical; taper and thrust
Through or Case Hardened
Available in metric and inch dimensions

Cylindrical Roller Bearings

Single Row Double Row Type Code: N, NJ, NU, NUP

Thrust Ball Bearings

Single or double direction - Steel or brass cage
Thrust ball bearings are divided into single and double direction types.

Angular Contact Ball Bearings

Single Row - Double Row ACH type high speed bearings were designed to contain more balls than standard bearings
